

Prasanna Kulkarni

Full Stack Engineer | AI Systems | Backend Engineering

Pune, Maharashtra

+91 7248921732 | pkulkarni0401@gmail.com

GitHub – Prasanna04-01 | LinkedIn – pkulkarni04

Education

BE Information Technology

JSPM's BSITR, Pune

2025 – 2028

CGPA: 8.59

Diploma Computer Engineering

BSP Polytechnic, Pune

2022 – 2025

85.09%

Skills

Languages:

Java, C++, Python, JavaScript, SQL

Frontend:

React.js, Next.js, Tailwind CSS

Backend:

Node.js, Express.js, FastAPI, REST APIs, JWT

Database:

MongoDB, PostgreSQL, MySQL

AI & Tools:

LLM Integration, OpenRouter API,
Claude, Gemini, Cursor, Docker, Git, GitHub

Certifications

- Google Gemini Certification
- Tata Data Visualization
- Forage Technology Simulation

Twitter/X: pkulkarni0401

Languages

- English | Fluent
- Hindi
- Marathi

Soft Skills

- Problem Solving
- Adaptability
- Team Collaboration
- Communication
- Time Management

Summary

Computer Engineering student skilled in full stack and backend development, building scalable web applications and AI-powered solutions. Strong expertise in JavaScript, TypeScript, React.js, Node.js, FastAPI, REST APIs, JWT Authentication, databases (MongoDB, PostgreSQL, MySQL), API integration and deployment. Proficient with Git, GitHub, Docker and modern development practices. Passionate about delivering high-performance, user-centric, and production-ready solutions.

Projects

AI-Powered Healthcare Platform

React.js, Node.js, FastAPI, MongoDB, JWT, REST APIs, Docker

- Engineered an AI-powered healthcare recommendation platform with personalized treatment workflows.
- Built and secured REST APIs with JWT authentication, reducing response latency by 25%.
- Integrated AI assistant for smart recommendations, improving user workflow and engagement.
- Deployed using Docker for consistent environments and scalability.

Engineering Repo Analyzer

React.js, FastAPI, Python, PostgreSQL, GitHub API

- Developed a repository analysis tool to visualize dependencies, architecture and code metrics.
- Implemented backend services with FastAPI and PostgreSQL, improving analysis performance by 30%.
- Integrated GitHub API for automated data fetching and engineering insights.

Netflix-Inspired Streaming Platform

Next.js, TypeScript, Tailwind CSS, API Integration, Vercel

- Developed an OTT-style streaming platform with dynamic routing, trailer playback, and search functionality.
- Built responsive UI with reusable components, enhancing user experience across devices.
- Integrated TMDB API for content data and optimized performance, achieving faster load times.

Hackathon Experience

24-Hour Hackathon Participation

Apr 2026

- Built AI-driven workflow solutions in a rapid-development environment using modern full stack technologies.
