Summary

Computer Engineering graduate with experience building scalable applications and automating deployments using DevOps practices. Proficient in MERN stack and CI/CD tools including Jenkins, Docker, Kubernetes, and Terraform. Developed scalable applications using Java Spring Boot microservices architecture and built a GenAI-based solution leveraging Amazon Bedrock (Claude). Strong foundation in Data Structures, problem-solving, and software development.

Education

BE in Computer Engineering | CGPA- 8.55

2022-2025

JSPM's Bhivarabai Sawant Institute of Technology & Research

Pune, Maharashtra

Diploma in Computer Engineering | Percentage-87.76

2019 - 2022

Government Polytechnic Aurangabad

Aurangabad, Maharashtra

Technical Skills

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks/Libraries: ReactJS, NodeJS, ExpressJS, Redux, Bootstrap, TailwindCSS

DevOps & Tools: Jenkins, Docker, Kubernetes, Terraform, Git

Cloud & AI: AWS (EC2, S3, ECR), Amazon Bedrock, Amazon Q, Claude 3 Sonnet

Core CS: Data Structures & Algorithms (DSA), OOPS, DBMS

Concepts: CI/CD Pipelines, Microservices Architecture, Containerization, Deployment Automation

Database: MongoDB, MySQL

Training

- Full Stack Intern – Sumago Infotech: Developed responsive web pages using HTML, CSS, JavaScript. **Aug 2021 – Sept 2021**
- MERN Stack Training – Internshala: Built full-stack applications using React, Node.js, and MongoDB. **May 2024 – Dec 2024**

Experience

Capgemini - Software Engineer

Sep 2025 – Apr 2026

- Implemented and optimized **CI/CD pipelines using Jenkins**, improving deployment efficiency
- Automated build and deployment workflows using **Docker and Kubernetes** across environments

Certifications

- AWS Certified AI Practitioner
- Microsoft Certified: Azure AI Fundamentals

Projects

YouTube Clone - Video Sharing Platform | React, Redux, Node.js, Express.js, MongoDB, JWT, Multer, Cloudinary | **Feb 2025**

- Developed a full-stack video platform with **JWT-based authentication** and efficient **media upload pipeline** using Multer and Cloudinary.
- Implemented **dynamic search, video playback, and responsive UI**, enhancing user experience and content accessibility.

ShoppYGlobe - E-commerce Application | ReactJS, Node.js, Express.js, MongoDB, Redux | **Jan 2025**

- Built scalable **RESTful APIs** with **JWT authentication** for secure user and product management.
- Developed a **responsive e-commerce interface** with features like product listing, cart management, and optimized performance.

Mentor Management System | Java, Spring Boot, Spring Cloud, Eureka, API Gateway, MySQL, Docker, Jenkins, AWS EC2

- Architected a **10 microservices-based system** with service discovery (Eureka), API Gateway, and **JWT-based role & ownership-level security**, ensuring scalable and secure communication.
- Automated deployment** using **Docker** and **Jenkins CI/CD pipeline**, with services hosted on **AWS EC2**, enabling efficient builds, service orchestration, and monitoring.

IdeaSmith – AI Startup Idea Generator | Python, Flask, React.js, AWS Bedrock, LangChain, LangGraph, Docker, Kubernetes, Jenkins

- Built a full-stack **GenAI application using AWS Bedrock (Claude)** and LangGraph workflows to generate startup ideas, business plans, and investor pitches from user inputs.
- Containerized using **Docker** and deployed on **Kubernetes (EKS)** with a **Jenkins CI/CD pipeline**, enabling scalable, automated, and zero-downtime deployments.
